

## BOVINE TB - A WAY FORWARD

Bovine TB is an insidious disease that is spreading across our countryside at an alarming rate. This film tells the story of its effect on two farms in the South West of England, one beef, the other dairy. By cataloguing the history of the disease and talking to expert witnesses, the film bridges the gap between those who view the problem as contentious and insurmountable, and those who believe there is a way forward.

*The film was made with the support of the following individuals and organisations:*

Mole Valley Farmers  
Quicke's Traditional Cheddar  
Dartmoor Commoners' Council  
Forest of Dartmoor Commoners' Association
